

# Portable Sorter Solution

## BENEFITS OF A PORTABLE SORTER

- As business changes, this sorter can be rolled onto a truck and transported from one facility to another to meet demands.
- The sorter can easily be moved within the facility to clear up floor space dependent upon layout changes.
- The sorter is able to handle mixed products, both bags and cartons at a maximum rate of 35 CPM.
- Easy integration for customers. Customers only need to provide a twist lock power feed, data cabling, and WMS integration testing.
- The sorter can help relieve labor demands for companies who see frequent business changes and seasonality demands.

Providing functionality and flexibility, the portable sorter fits the mold of companies who see frequent business changes and seasonality demands.
